the 1990s, the number of people in the world who are illiterate has increased from 500 million to 700 million.

It is not only the illiterate who are at risk of being left behind. The world's population is growing rapidly, and the number of people who are poor is increasing. In 1990, there were 1.2 billion people living on less than \$2 a day. By 2000, there were 1.5 billion, and by 2010, there will be 2 billion.

The world's population is also becoming more diverse. There are now over 200 different languages spoken in the world, and the number of different ethnic groups is increasing. This diversity is a source of strength, but it also presents challenges.

One of the biggest challenges is how to ensure that everyone has access to the benefits of globalization. We need to find ways to help the poor and the illiterate to participate in the global economy. We need to invest in education and training, and we need to create jobs for everyone.

Another challenge is how to ensure that the benefits of globalization are shared fairly. We need to find ways to reduce the gap between the rich and the poor, and we need to ensure that everyone has access to the same opportunities.

Finally, we need to find ways to ensure that globalization is sustainable. We need to protect the environment, and we need to ensure that we are using our resources wisely. We need to find ways to balance economic growth with social and environmental concerns.

Globalization is a double-edged sword. It has brought us many benefits, but it has also brought us many challenges. We need to find ways to maximize the benefits and minimize the challenges. We need to work together to create a better world for everyone.

Globalization is a process that is changing the way we live and work. It is bringing people from different parts of the world together, and it is creating new opportunities. But it is also creating new challenges. We need to be prepared to meet these challenges head-on.
