A technical line drawing of a crane arm (Drehkran) in a retracted position. The arm is composed of several interconnected segments, including a long horizontal jib and a vertical support structure. At the end of the jib is a hook mechanism. The drawing shows the internal structural details and joints of the crane.

This diagram illustrates the exploded view of a hydraulic cylinder assembly. The central component is the piston rod, which is shown with the piston assembly at one end and the rod end fitting at the other. The piston assembly includes the piston head, piston rod, and piston seal. The rod end fitting includes the rod end seal, rod end bush, and rod end nut. The diagram shows the relative positions of these components for assembly.

This exploded view diagram illustrates the assembly of a mechanical component, likely a pump or motor housing. The parts are numbered as follows:

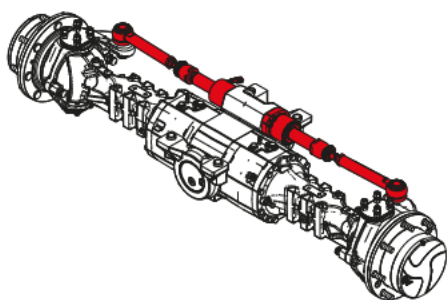

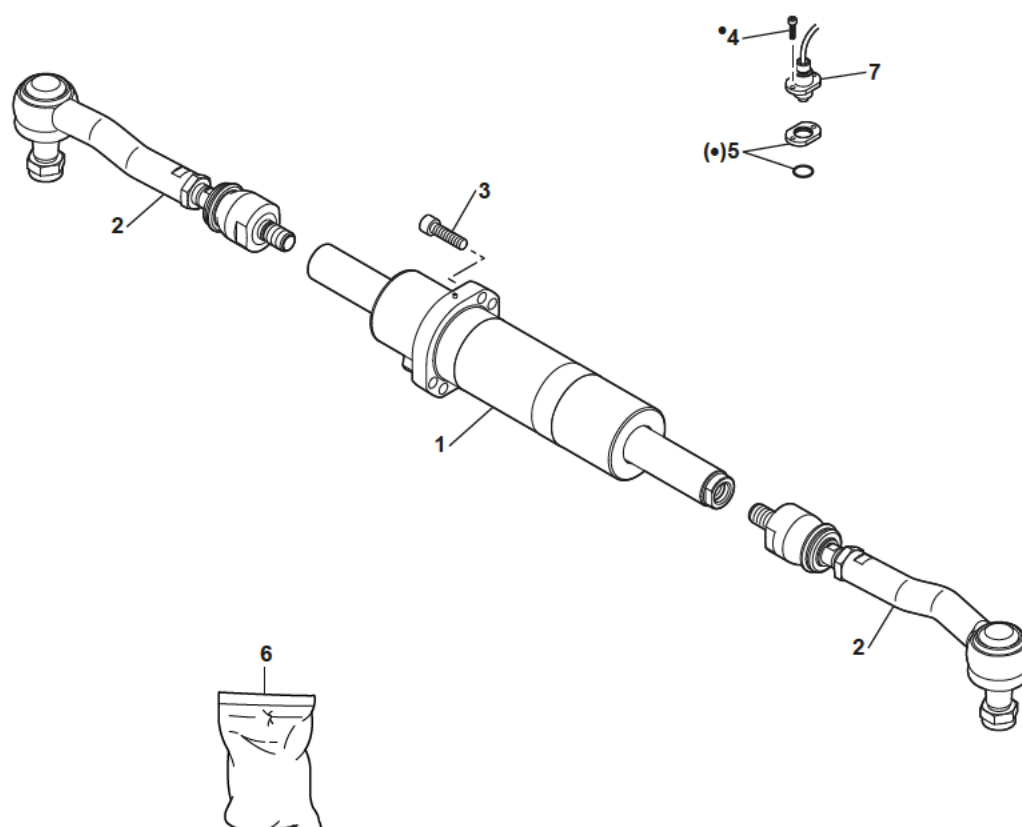

- 1, 2, 3, 4:** A series of concentric rings or seals.
- 5, 6, 7, 8:** Small fasteners or pins.
- 9, 10, 11, 12:** Screws and bolts used for assembly.
- 13, 14:** A pin and a long bolt.
- 15, 16:** Two large circular plates or covers.
- 17, 18, 19:** Small pins or fasteners.
- 20, 21:** A bolt and a pin.
- 22, 23:** A series of gears or interlocking rings.
- 24:** A small gear or pinion.
- 25, 26:** Small fasteners or pins.

The diagram shows the spatial relationship between these components, with dashed lines indicating the assembly path. The main housing (part 15) is the central component, with various parts being attached to its top, bottom, and side surfaces.

This diagram shows an exploded view of a mechanical assembly, likely a pump or motor. The central component, which appears to be the impeller or a similar rotating part, is highlighted in red. It is surrounded by various housing components, bearings, and shafts. The assembly is shown in a disassembled state to illustrate the relationship between the parts.

This exploded view diagram illustrates the assembly of a mechanical component, likely a pump or motor. The main assembly consists of a central shaft (1) with a series of gears (12, 13, 14, 15, 16, 17, 18, 19, 20) mounted on it. The shaft is supported by a housing (2) and a flange (25). Various fasteners, including bolts (2, 3, 4, 9, 10, 18, 21, 22, 23, 24, 26, 28), washers (6, 7, 8), and seals (11, 24), are shown in their respective positions. Two bags of lubricant, labeled 29 and 30, are shown at the bottom left, indicating the application of grease to the assembly.

A detailed technical line drawing of a robotic arm assembly, viewed from an isometric perspective. The assembly includes a base plate with mounting holes, a vertical support structure, and a horizontal arm. A red cylindrical component is mounted on the arm. The drawing shows various mechanical details like bolts, flanges, and internal components.

This diagram shows an exploded view of a vehicle body. The roof and side panels are highlighted in red, indicating they are the components being discussed in the text. The diagram shows the internal structure of the vehicle, including the frame and the location of the roof and side panels. The roof panel is shown in two positions: one attached to the frame and one detached, showing the internal structure. The side panels are also shown in two positions: one attached to the frame and one detached, showing the internal structure. The diagram is a technical drawing, likely from a service manual, used to illustrate the assembly and disassembly of the vehicle body.

A detailed technical line drawing of a mechanical assembly, possibly a vehicle seat or a control unit. The drawing shows a complex structure with various components, including a large, curved, light-colored part at the top. A prominent red component, which appears to be a lever or a control arm, is highlighted in the lower-left area. The entire assembly is mounted on a base plate with various slots and mounting points. The drawing is a black and white line art, typical of technical manuals.

Diagram (a) shows a robotic arm in a bent configuration. The base is a red motor. The arm consists of several white links connected by black joints. The end effector is a black gripper. Diagram (b) shows the same robotic arm in a different configuration, where the arm is more extended and the gripper is positioned differently.
